

The Platio Smart Banking Ecosystem is tailored for individuals and businesses and provides banking and trading services in three asset types: fiat, crypto and stocks. Powered by EOS technology, Platio adds the speed and transparency of blockchain to the reliability and compliance of traditional finance.

Competitive advantages

- UK and EU crypto and fiat licences
- Solution for risks of private keys loss, volatility and irreversible payments
- Own Blockchain and Smart contract based products
- Quick processing of up to 100K transactions/sec
- Transparent commissions

Unique instruments:

- Asset Guard
- Smart Escrow

Why Platio Tokens?

- Fuel for all commissions and fees
- Access to premium features
- Buy Back & Stacking
- Token price growth through decreased velocity
